Ford Ranger is a name used by Ford on three different model series. The name first appeared in 1958 when the Edsel Ranger was added as the base trim of the Edsel model series. As the 1983 model year, the Ford Ranger title was used for a new compact pickup truck, substituting the Ford Courier in North America. During 2011, the Ranger was abandoned in North America and in the same year, the production of a mid-size Ford Ranger was started. Though the model was sold globally, production was restored in the United States in 2018. The Ford Ranger is equipped with a turbocharged 2.3-liter four-cylinder engine that produces 270 hp and 310 lb-ft of torque. All Ranger trucks are paired to a 10-speed automatic transmission. The Ranger has a towing capacity up to 7,500 pounds, and a payload capacity of 2,080 pounds. The rear-wheel-drive is the standard while four-wheel drive is an option. Ford Ranger known problems Some of the common problems or complaints owners have about the Ford Ranger are: The 2002 Ford Ranger owners reported transmission problems and the sparse flashing of the overdrive light. The 2004 model is known to have engine troubles and misfires. The 2007 Ford Rangers model reported having transmission and shifting issues along with steering problems. Below you can find the owners manuals for the Ranger model sorted by year. The manuals are free to download and are available in PDF format. Is is recommended to check the owners manual corresponding to the correct year of your Ford Ranger to solve the problems or to get insights about the car. The Ford Ranger is a range of compact pickup trucks sold around the world since 1998, though it was available in the USA and Canada be wider if desired at the point of ordering a Ranger new, increasing the stance of the vehicle and flaring the arches out. In terms of size with the rest of the Ford range, it slots in just below the full-size F-150 designed for the US and Canadian markets. To help the truck appeal to various budgets and uses the company has created a variety of trims including: Edge FX4 Lariat Splash Sport STX Tremor XL XLT Please stop faking performance. Driving is an experience that requires all of the senses to work together and gather information in order to make decisions on the fly. While a driver's line of sight is taken up by the road in front, the ears help determine how fast the engine is spinning and when a shift is required. The problem is, most of today's downsized and turbocharged gas-saving engines don't sound as loud as larger engines, so drivers have a hard time determining when to shift. Higher revs are the result as drivers strain to hear when they need to shift. This negates the fuel savings that come from a small and turbocharged engine because the engine is consistently sucking gas in higher RPMs. In an effort to make racy drivers shift sooner and save gas, Ford has patented a gimmick that everyone is sure to hate. It takes the already despised speaker systems that pipe in fake engine notes into the cabin and fools the driver by making the engine sound like it has more cylinders than it does. This means that an engine like Ford's 1.0-liter turbocharged EcoBoost found in the Fiesta will sound like it has the V6 or V8 of a Mustang. A fooled driver will then shift a lot sooner and save Ford from hearing complaints about fuel economy. It seems like Ford also wants to help drivers get real world fuel economy numbers that match the advertised ones. Given that the main buyer of manuals are enthusiasts or people who generally like to have more fun while driving, Ford's system seems aimed at the types of people who willingly rev their engines and not those who don't know how to shift correctly. Even though a smaller engine does take some getting used to, a good driver can use acceleration feel to know when to shift. Whether or not the fake replacement for displacement works to save fuel is unclear, but this is exactly the type of technology that makes us hate the future. Of course, we'd prefer to have a car that features a shouty exhaust, but at least we still have the Mustang for that.
